A complete scalable PV systems solution for 1.70 Euro/Watt **bravo**solar

Moncada Solar Equipment (MSE), a branch of Moncada Energy Group, offers a complete scalable PV systems solution comprising of thin-film solar panels, boosters and mounting systems for ground installations.

The electrical system is specifically designed for enhanced panel monitoring and power harvesting. The standard installation has a capacity of 250 kW but is scalable according to customer needs and can be easily replicated to accommodate large scale MW type projects. All components are proprietarily developed and manufactured by MSE and shipped in one complete package ready for installation. With a total price of 1.70 Euro / Watt, this system is a new standard for complete PV power plant solutions.
